**1. This opinion contains indications relating to the following items:**

- ☒ Box No. I Basis of the opinion
- ☒ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

**2. FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

**Box No. I Basis of the opinion**

---

1. With regard to the **language**, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
  - ☐ This opinion has been established on the basis of a translation from the original language into the following language , which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
  - a. type of material:
    - ☐ a sequence listing
    - ☐ table(s) related to the sequence listing
  - b. format of material:
    - ☐ in written format
    - ☐ in computer readable form
  - c. time of filing/furnishing:
    - ☐ contained in the international application as filed.
    - ☐ filed together with the international application in computer readable form.
    - ☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additional comments:

**Box No. II Priority**

---

1. ☒ The following document has not been furnished:

☒ copy of the earlier application whose priority has been claimed (Rule 43*bis*.1 and 66.7(a)).

☐ translation of the earlier application whose priority has been claimed (Rule 43*bis*.1 and 66.7(b)).

Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date is the claimed priority date.

2. ☐ This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43*bis*.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.

3. Additional observations, if necessary:

**Re Item V.**

- 1 The following documents are referred to in this communication:  
D1 : US 3 874 479 A (LUCK MEREDITH ET AL) 1 April 1975 (1975-04-01)  
D2: US-A-5 568 857 (CHEN KUAN-CHOU ET AL) 29 October 1996 (1996-10-29)
- 2 Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parenthesis applying to this document):  
A movable table for serving out food (column 3, lines 48-51), the table having an operating position for serving out food and a transportation position (dismantled) for transporting the table.  
From this, the subject-matter of independent claim 1 and 15 differs in that:  
The movable table has two modules comprising automatic transferring device with a transferring mechanism that is disengaged when the table is in transportation position and connectable when the table is brought into operation position.
- 2.1 The subject-matter of claim 1 and 15 is therefore novel (Article 33(2) PCT)  
The problem to be solved by the present invention may be regarded as:  
The time consuming in installing a movable table having an automated transferring device in a desired location.
- 2.2 The solution to this problem proposed in claim 1 and 15 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:  
No document shows the combination mentioned in claims 1 or 15
- 2.3 Claims 2-14 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
- 3 Document D2 discloses (the references in parenthesis applying to this document):  
A liftable roller conveyor having two modules with a transferring mechanism that is operatively connectable to a transferring mechanism of a neighbouring module.  
From this, the subject-matter of independent claim 1 and 15 differs in that:  
The roller conveyor of D2 is not a movable table (It is often mounted on the floor), and the mechanism is not engaged or disengaged for transportation purposes.

- 3.1 The subject-matter of claim 1 and 15 is therefore novel (Article 33(2) PCT).
- 3.2 The subject matter of claim 1 and 15 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:  
A roller conveyor having a liftable section to allow persons, trucks etc. passing through has nothing in common with a table that is movable to be installed quickly at a new location for serving out food.
- 3.3 Claims 2-14 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
